

**Biotechnology**  
Innovation Organization

June 4–5, 2023

#BIO2023  
#StandUpForScience

# Biotechnology Entrepreneurship Boot Camp

Presented by:

Thani Jambulingam, PhD

Professor

Pfizer Fellow, Arrupe Research Fellow  
Department of Pharmaceutical and Health  
Care Marketing, St. Joseph's University

*BIO Recognizes Course Sponsor:*

**McDonnell Boehnen  
Hulbert & Berghoff LLP**  
Intellectual Property Law

# Learning Objectives

- Highlight the importance of commercial team input into product development strategy in a early stage biotech/medical device company
- Understand the role of marketing in early stage companies to shape the product life cycle to achieve the best commercial success.
- Describe the process of creating a commercially appealing target product profile (TPP).
- Learn how to develop a TPP framework to deliver better outcomes.

# Trends

- Health care priority: cost control, access and price transparency
- Consumerism will influence healthcare decisions
- Decreasing access to physicians
- Shifting power balance toward payers
- Reimbursement models focus on value/outcome
- Growth of alternative delivery models and partnerships
- Digital transformation enhancing patient centricity and engagement

# DEVELOPING A NEW MEDICINE TAKES AN AVERAGE OF 10–15 YEARS

# Net Spending Growth for Leading Therapy Areas

Source: IQVIA Institute, Mar 2022.

# Breakdown of Launches by Therapy

Source: IQVIA US Launch Quarterly May 2022

# Innovative Product

A differentiated product (solution) that offers a meaningful advantage (value) over existing treatments for a given condition

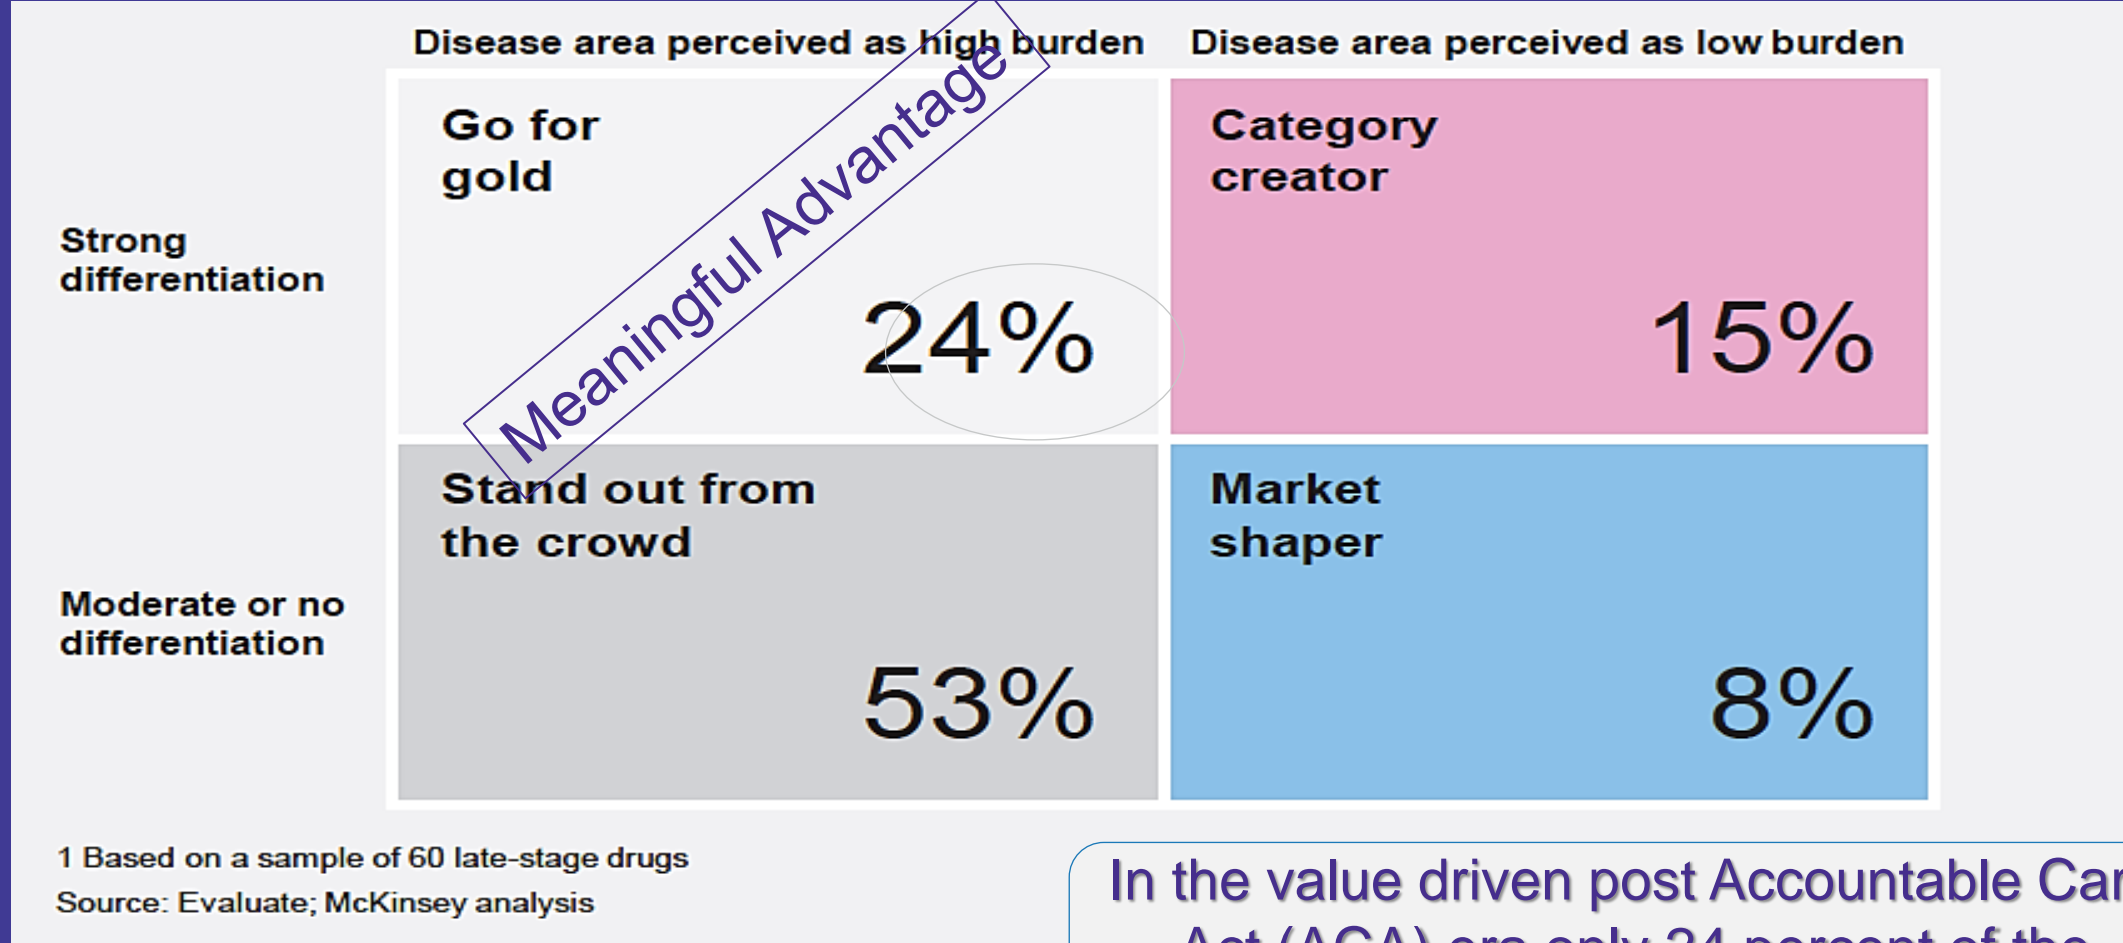

*How can marketing shape the product?*

# Objectives, 4 P's, A's of Marketing

Objectives	4Ps	4As
Address Unmet Needs	Product	Acceptability
Value to Payers	Price	Affordability
Create Convenience	Place	Accessibility
Communication of Value	Promotion	Awareness

# What Proportion of the Launches are Innovative?

In the value driven post Accountable Care Act (ACA) era only 24 percent of the launches would be truly innovative

# Rating Share of Launch Products

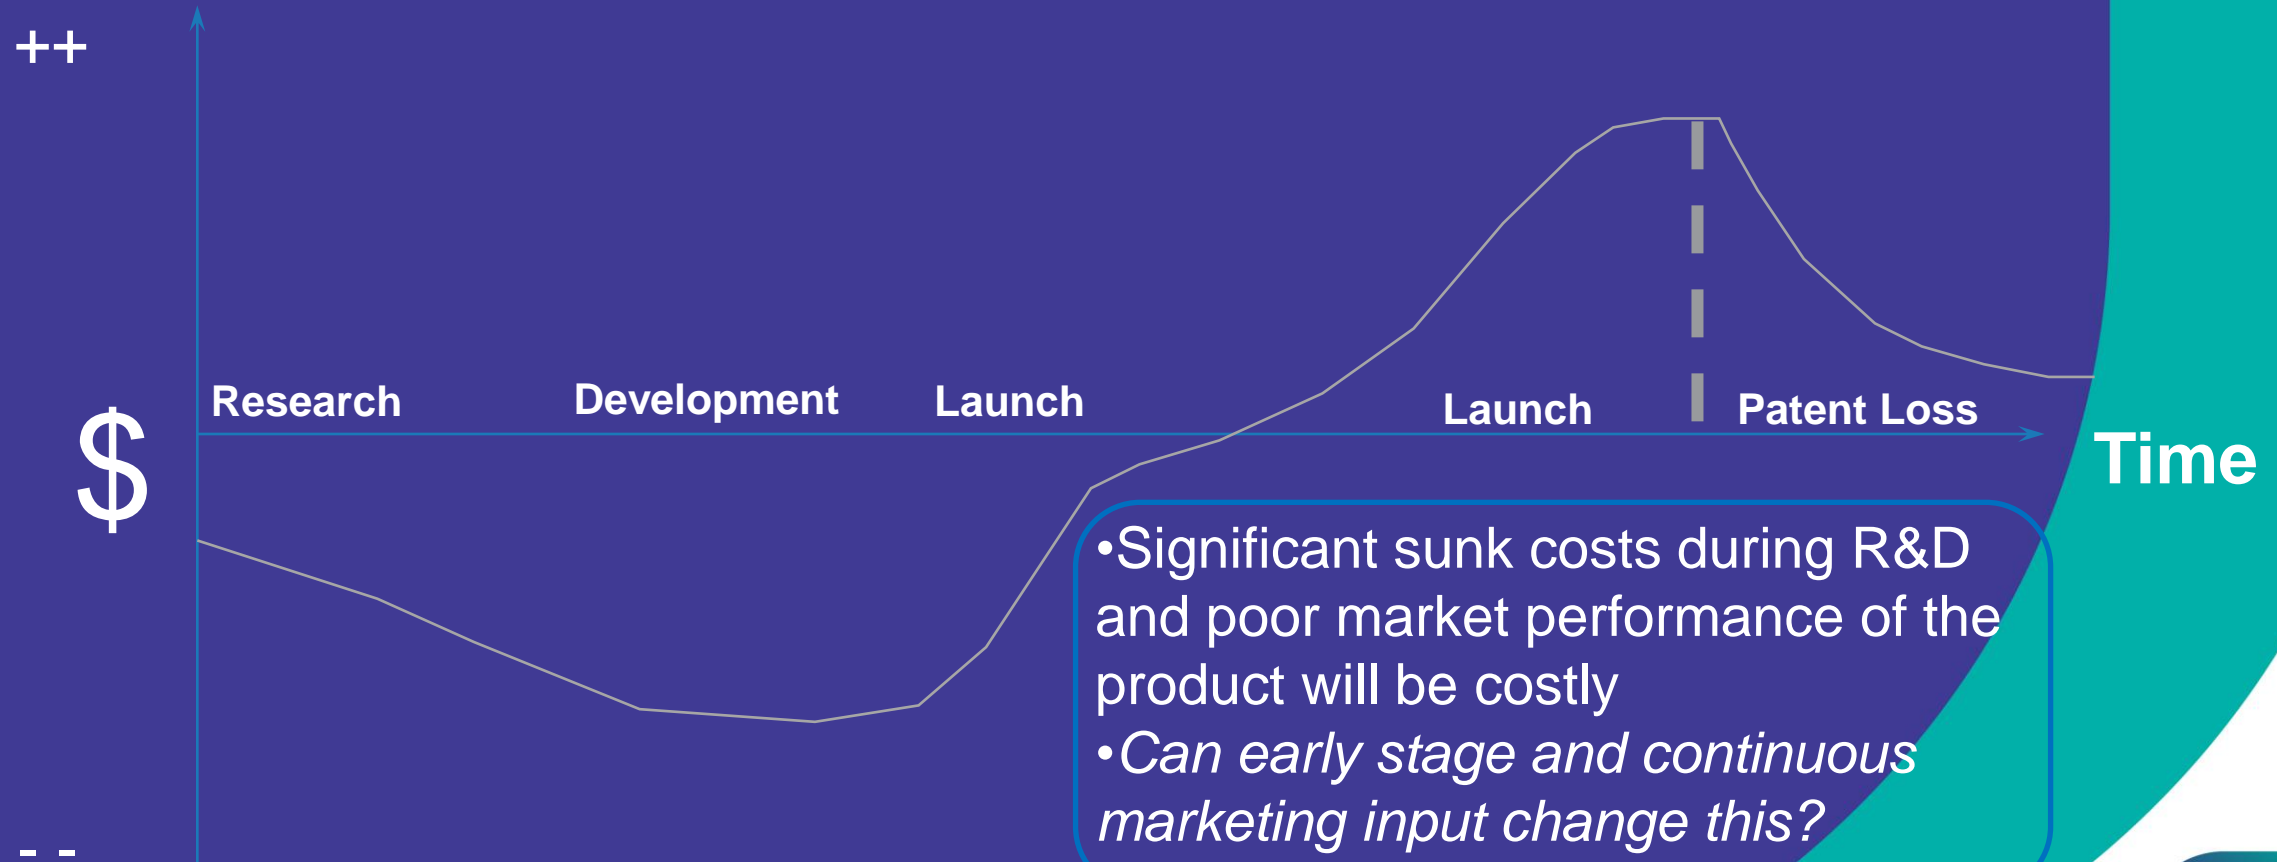

Source: National Sales Perspective, Launch MVP, Center of Launch Excellence, IQVIA

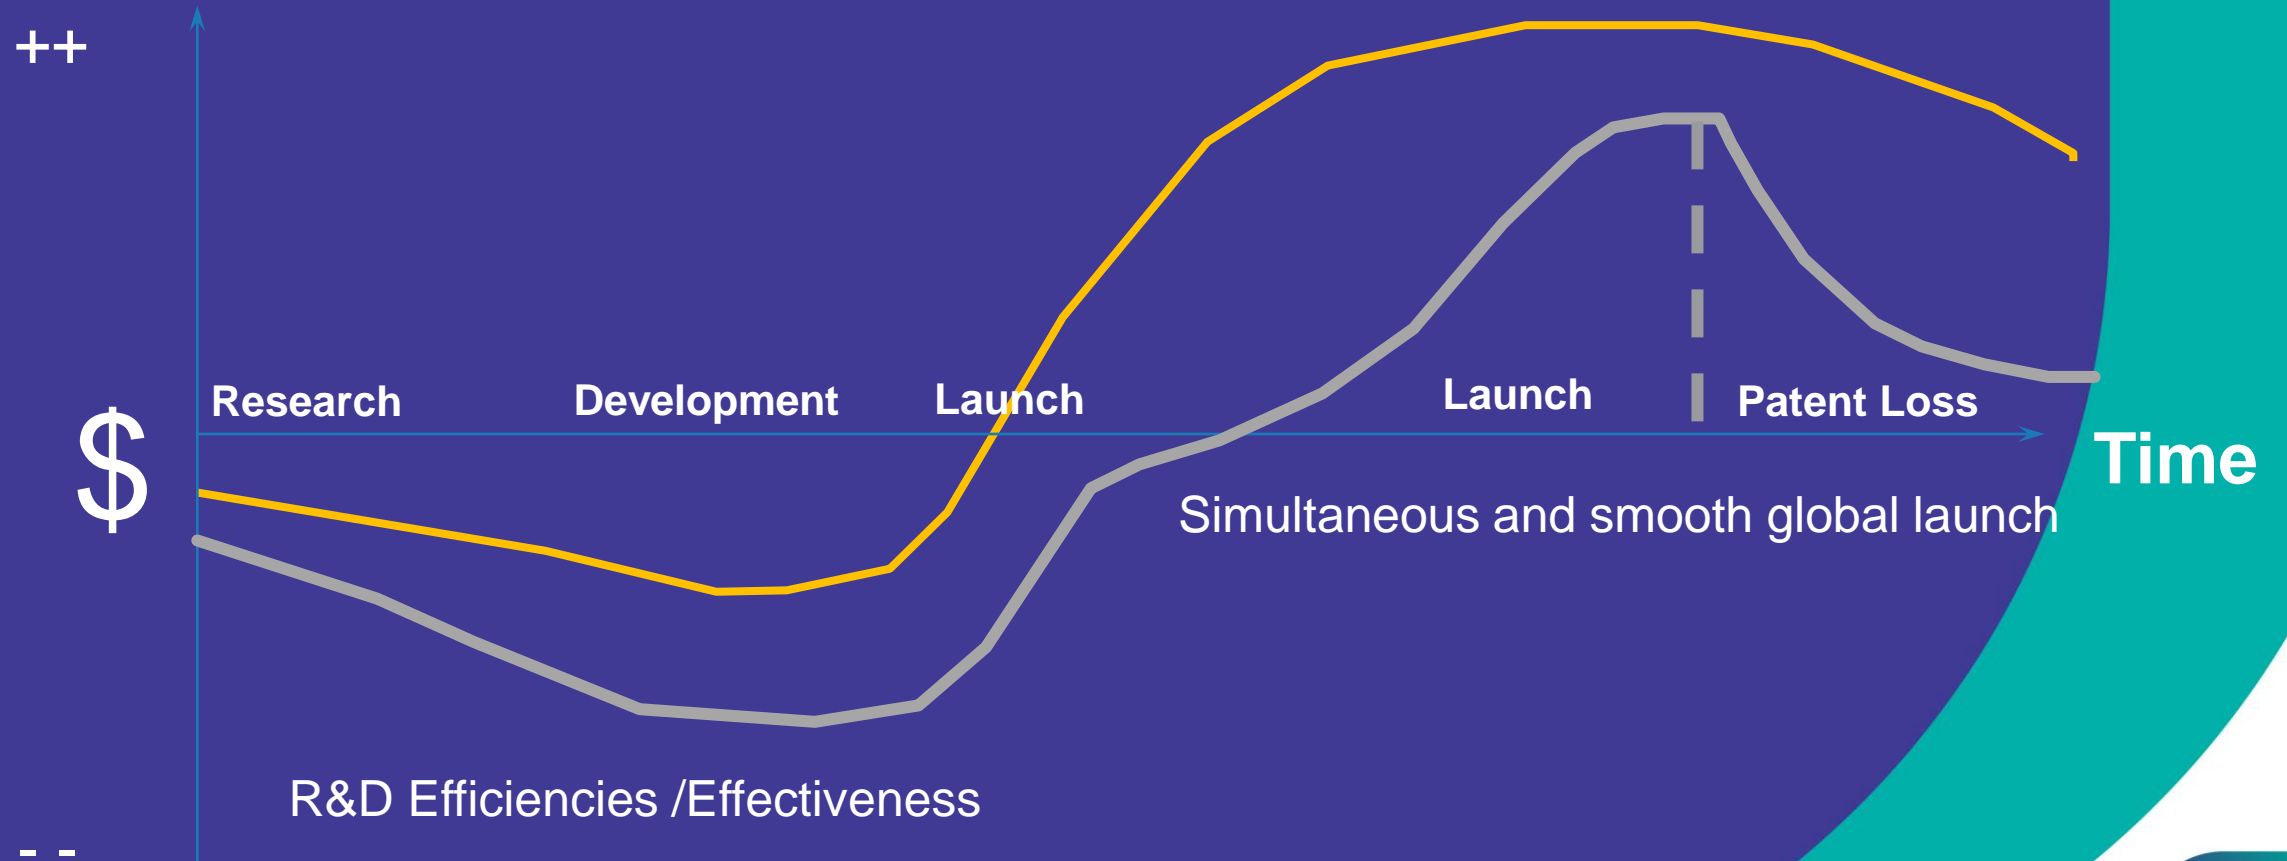

Notes: Includes Hepatitis C products. Launch performance is determined at month twelve by four criteria: share achievement, competitive rank, promotion-to-gross-sales ratio and gross sales.

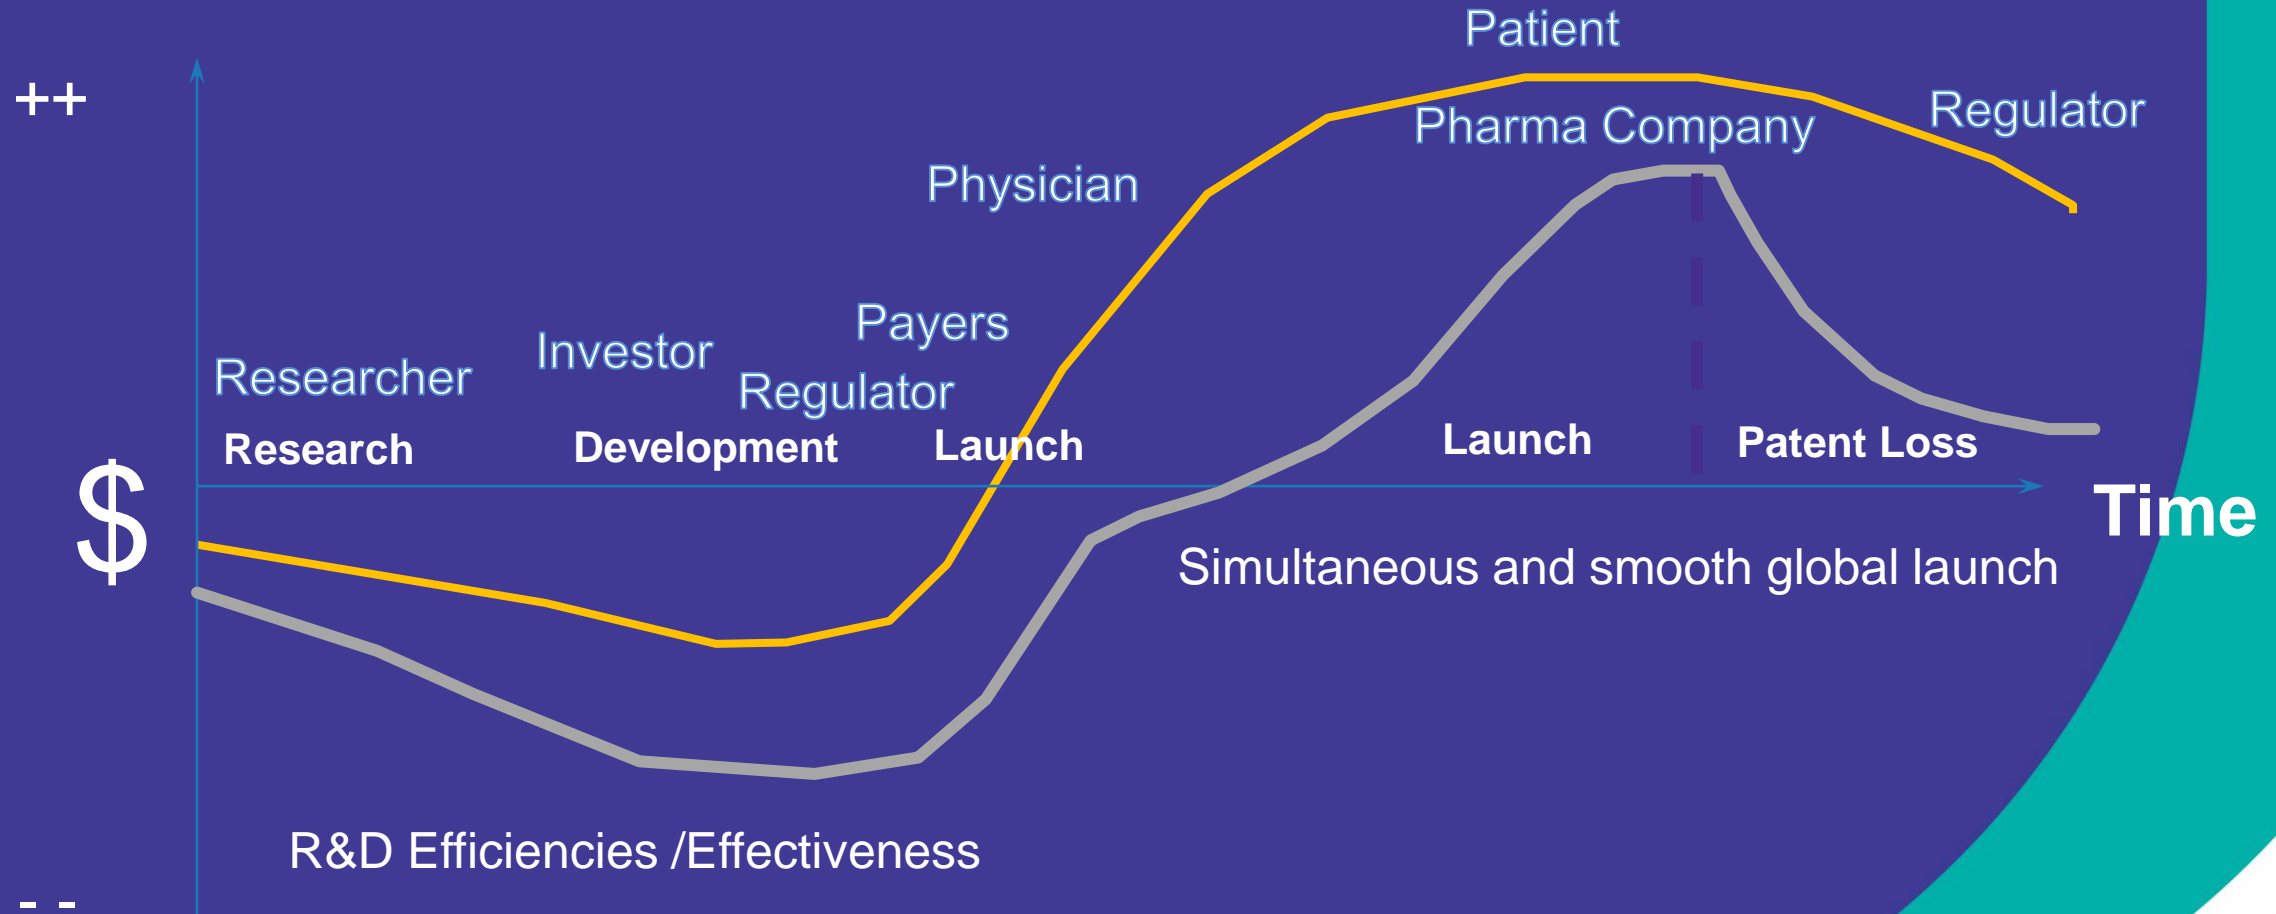

# How to Improve the Probability of Success?

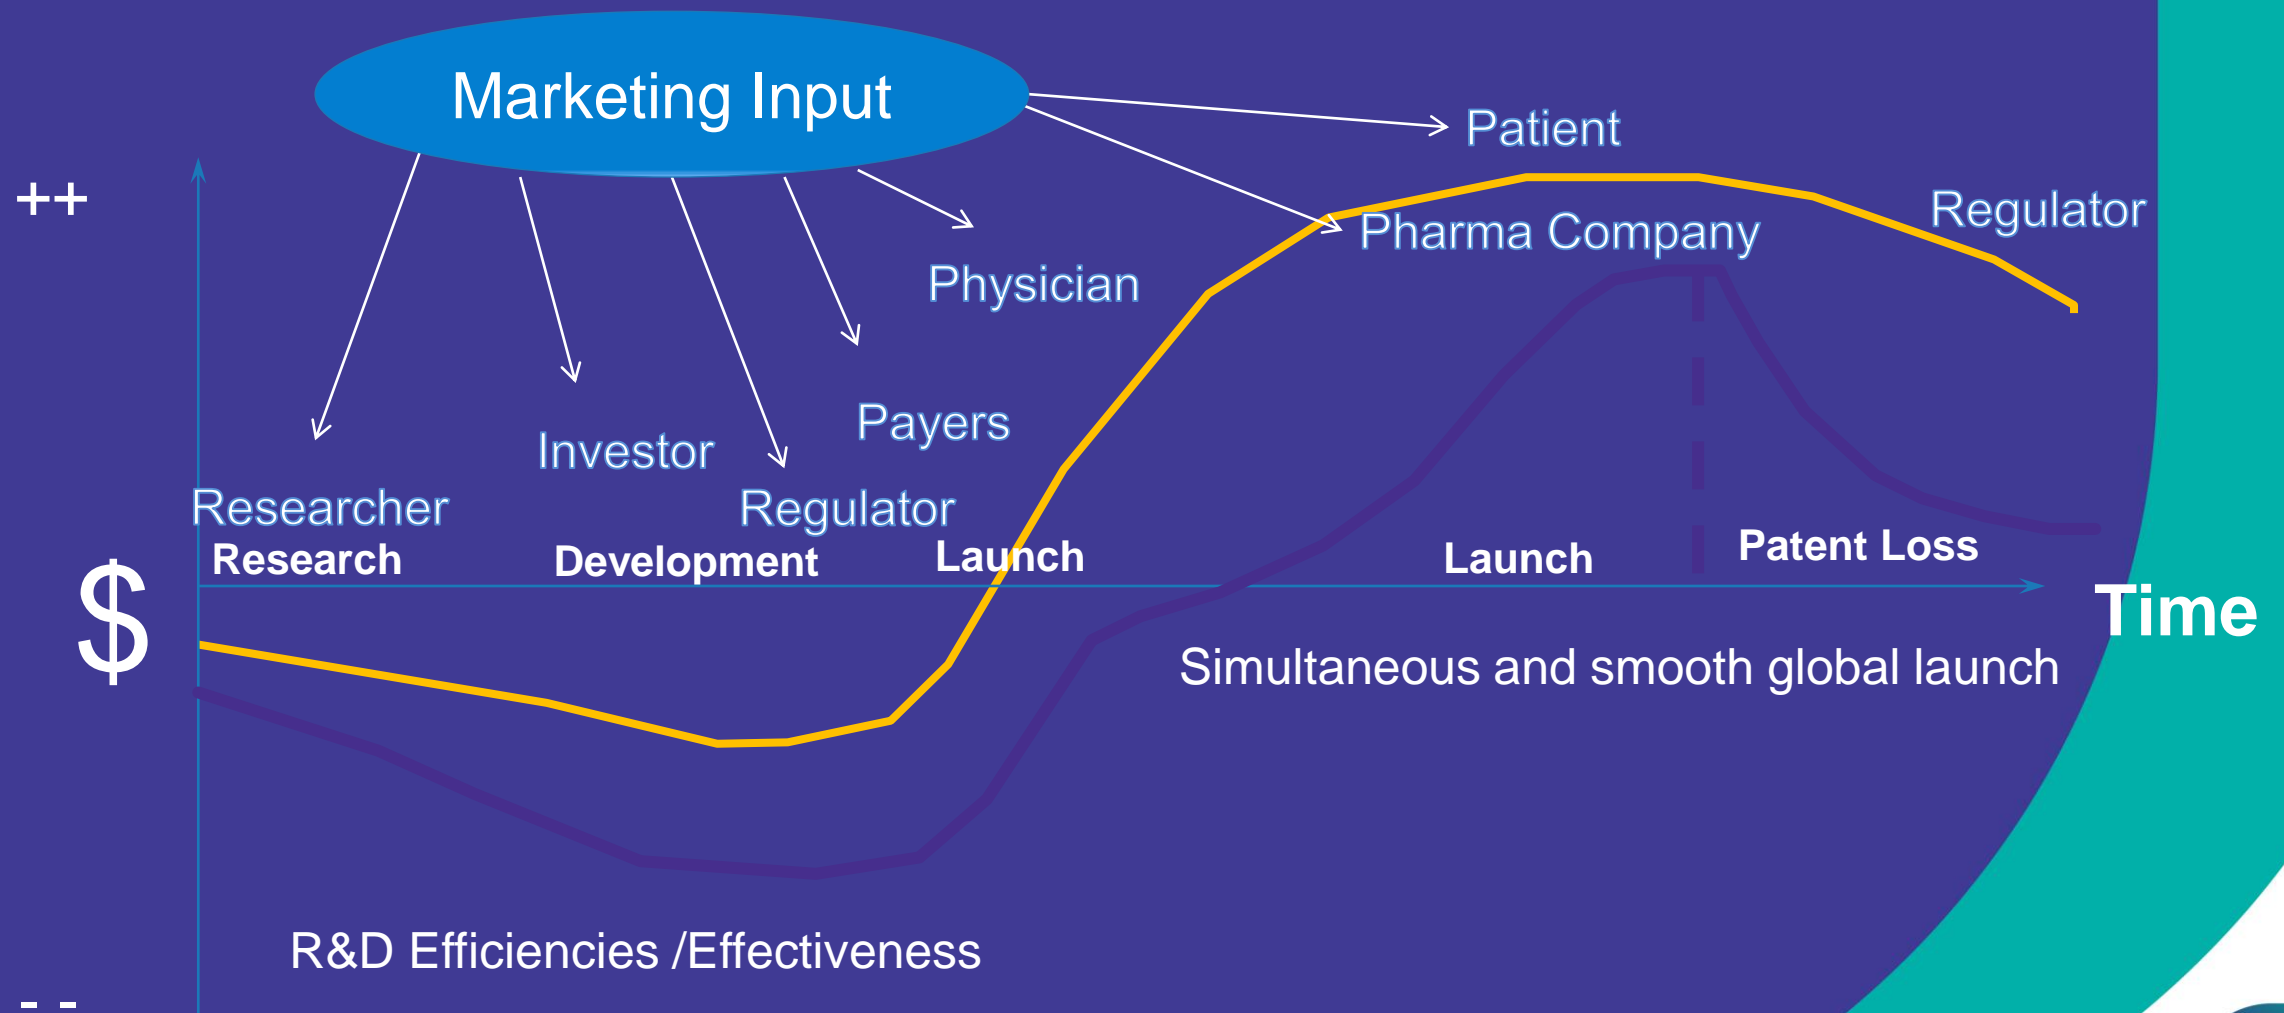

# Ideal Product Life Cycle

# Meeting Stakeholders Needs

# Early Marketing Input Can Improve Product Success

# Early Marketing Input Can Improve Product Success

					Submission	Launch	Growth			Rejuvenation
					Pricing Finalization	Launch/Adoption Tracking	Longitudinal Tracking	Maturity		
					Launch/Adoption Forecast	Promotional ROI Analyses	Patient Studies	Licensing/Acquisition	Line Extension Optimization	
					Phase III	Message Recall Studies	Patterns of Therapy	Decline	Competitive Recall Response Modeling	
					Positioning Studies	ATU Studies	Consumer Satisfaction Testing	Promotional Sensitivity	Erosion Tracking	
					Phase II	Market/Competitive Assessment	Defend Planning	Cannibalization Planning	Franchise Optimization

# What will Collaboration Achieve...?

## From....

# What will Collaboration Achieve...?

## To....an Integrated Model

Upstream Role of Marketing is Critical for developing an Ideal Label and Product Success!

# Marketing Facilitate Cross-Functional Decisions

Source: Jambulingam, T. (2018), The R&D Marketing Interface in BioPharma and MedTech, *Journal of Commercial Biotechnology*, 24(1), 48-55.

# What is TPP?

- In 2007 FDA created a guidance document on TPP as a strategic process development tool to facilitate effective communication between the industry and review staff
- TPP is the directional tool that has a significant impact on the drug development process and in particular, its marketing organization
- TPP convert discoveries into companies!
- Marketing as part of commercial team can shape the TPP

# Value of TPP

- Clear product definition
- Strategic decision-making
- Alignment with regulatory agencies
- Differentiation in the market
- Efficient resource allocation
- Effective communication and branding
- Risk mitigation

# Research shows TPP is valuable but underused

Source: Tyndall et.al. The TPP as a tool for regulatory communication: advantageous but underused, Nature, March 2017, pp. 156

# Research shows TPP Valuable but Underused

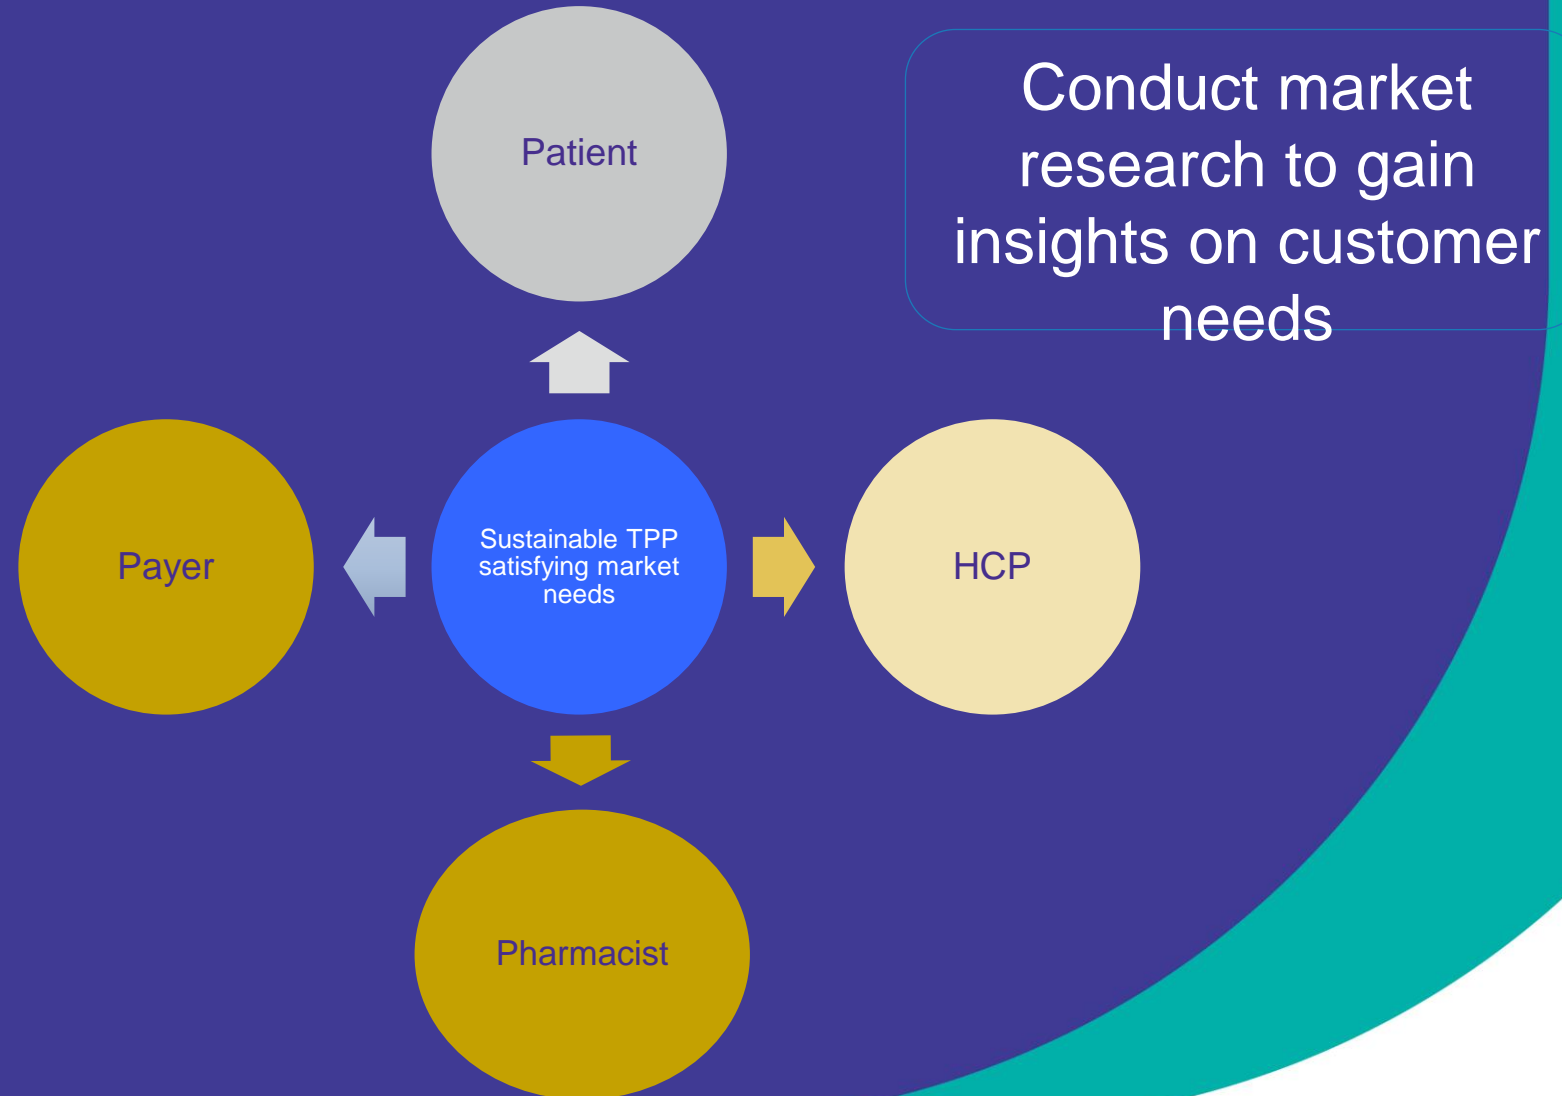

Source: Tyndall et.al. The TPP as a tool for regulatory communication: advantageous but underused, Nature, March 2017.

# Why is TPP underused?

- Flexibility in development
- Therapeutic areas with high uncertainty
- Regulatory variability
- Early-stage research
- Competitive landscape – Speed and Cost Effectiveness

# Start with end in mind: How should the label look to meet customer needs ?

# How can TPP be shaped by Marketing?

## TPP

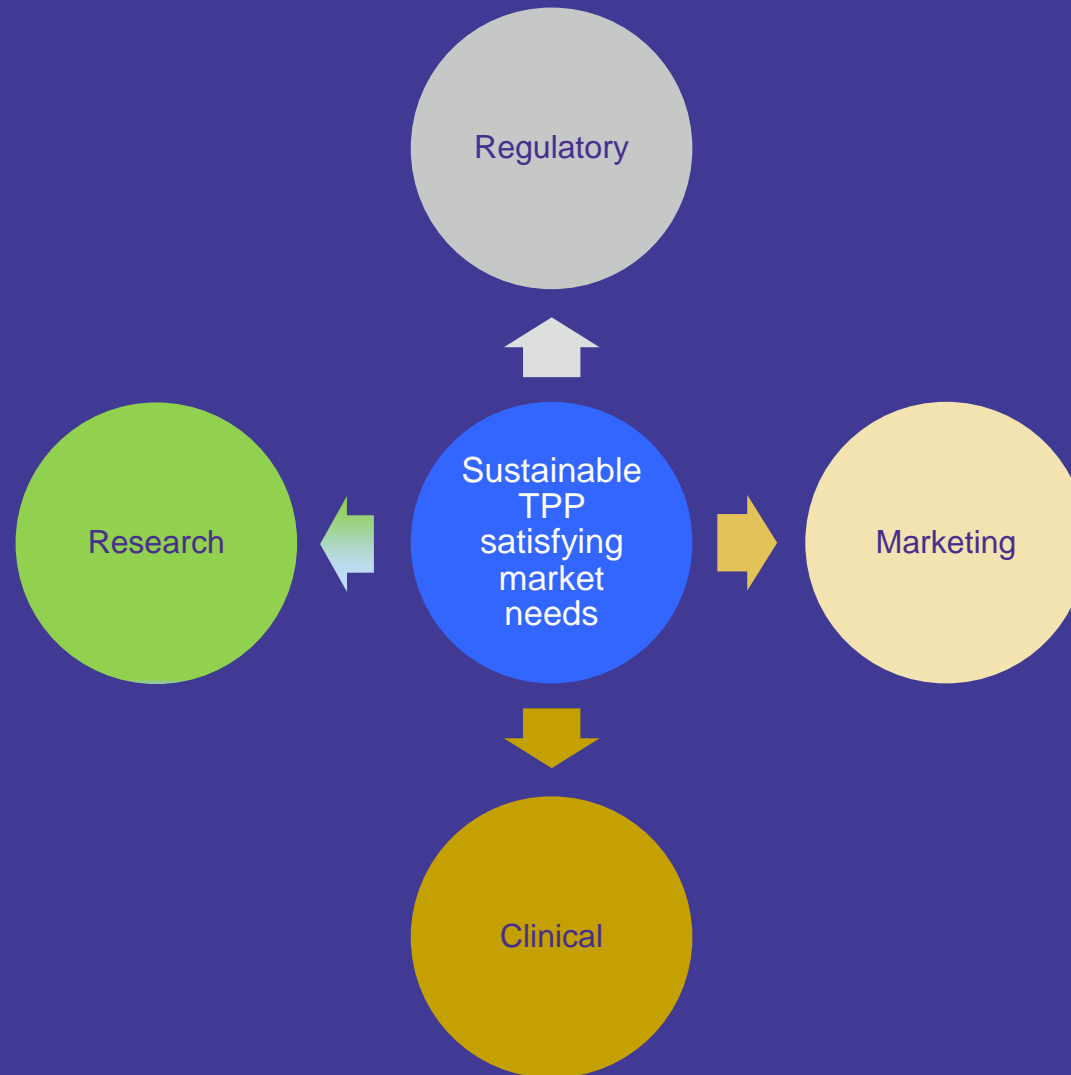

- Indication
- Dosage form
- Dose, frequency
- Differentiation
  - Efficacy
  - Safety
  - Economic

## Attributes Shaped by Marketing

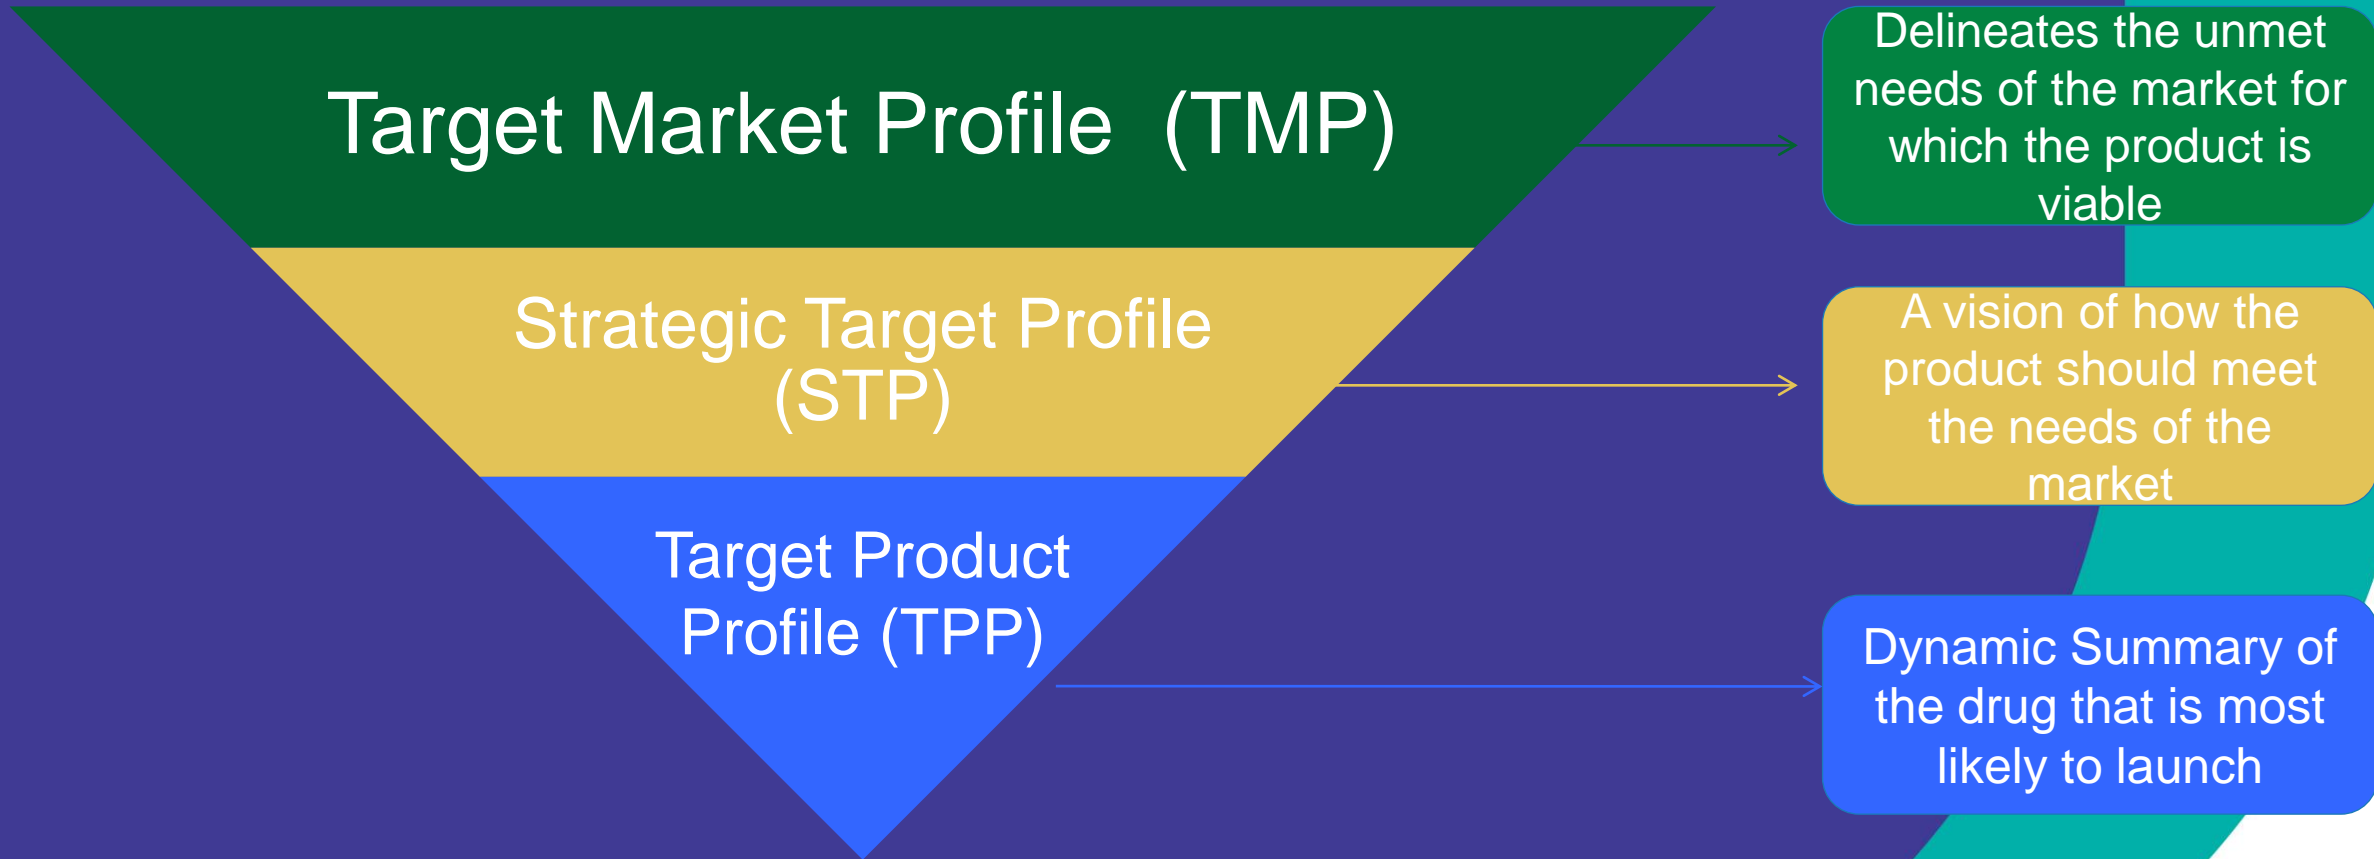

- Proposed indication
- Develop formulation
- Develop trade-dress
- Establish efficacy/superiority
- Establish safety advantage
- Develop for pediatric use
- Pharmacoeconomic data

# Who should work together?

**Goal:** To deliver strong development plan with superior clinical performance, patient benefit and health economic value

# STRATEGIC FRAMEWORK

Source: Tebbey, Paul W. and Charles Rink, "TPP: A Renaissance for its Definition and Use, Journal of Medical Marketing, Vol. 9 (4), 301-307.

# Strategic Framework

	Target Market Profile (TMP)		
Purpose	Captures all the key information about the market		
Content	<p>Therapeutic areas/diseases</p> <ul style="list-style-type: none"><li>• Unmet Need</li><li>• Patient Populations</li><li>• Drivers of use</li><li>• Competitive assessment</li><li>• Economic cost of disease</li></ul>		
Rigidity	Create before the STP or TPP Details are updated as findings emerge, but core facts change only in response to major market events		

# Strategic Framework

	Target Market Profile (TMP)	Strategic Target Profile (STP)	Target Product Profile (TPP)
Purpose	Captures all the key information about the market	A vision for a product that will meet the needs of the market	<ul style="list-style-type: none"> <li>✓ Positioning</li> <li>✓ Global Sales Forecast</li> <li>✓ Developmental Logic</li> <li>✓ Regulatory and Reimbursement Strategy</li> <li>✓ Product Value</li> </ul>
Content	Therapeutic areas/diseases <ul style="list-style-type: none"> <li>• Unmet Need</li> <li>• Patient Populations</li> <li>• Drivers of use</li> <li>• Competitive assessment</li> <li>• Economic cost of disease</li> </ul>	Target attributes (desired profile) <ul style="list-style-type: none"> <li>• Value drivers/Positioning</li> <li>• Global Reach</li> <li>• Pricing/Reimbursement</li> <li>• Patient Share</li> <li>• Revenue – Profitability</li> <li>• Pharmacoeconomics</li> <li>• Investments (R&amp;D, COGS, SGA)</li> <li>• Cost of goods</li> <li>• Licenses, Royalties</li> </ul>	
Rigidity	Create before the STP or TPP Details are updated as findings emerge, but core facts change only in response to major market events	Set at the beginning of clinical development and updated only when necessitated by changes in the TMP	

# Strategic Framework

	Target Market Profile (TMP)	Strategic Target Profile (STP)	Target Product Profile (TPP)
Purpose	Captures all the key information about the market	A vision for a product that will meet the needs of the market	A record of the drug that is most likely to launch
Content	Therapeutic areas/diseases <ul style="list-style-type: none"> <li>• Unmet Need</li> <li>• Patient Populations</li> <li>• Drivers of use</li> <li>• Competitive assessment</li> <li>• Economic cost of disease</li> </ul>	Target attributes (desired profile) <ul style="list-style-type: none"> <li>• Value drivers</li> <li>• Global</li> <li>• Pricing/Reimbursement</li> <li>• Patient Share</li> <li>• Revenue – Profitability</li> <li>• Pharmacoeconomics</li> <li>• Investments (R&amp;D, COGS, SGA)</li> <li>• Cost of goods</li> <li>• Licenses, Royalties</li> </ul>	Indications and usage (label) <ul style="list-style-type: none"> <li>• Dosing and administration</li> <li>• Contraindications</li> <li>• Warnings and precautions</li> <li>• Adverse reactions</li> <li>• Description</li> <li>• Clinical Pharmacology</li> <li>• Clinical Studies</li> <li>• Storage and handling</li> </ul>
Rigidity	Create before the STP or TPP Details are updated as findings emerge, but core facts change only in response to major market events	Set at the beginning of clinical development and updated only when necessitated by changes in the TMP	Updated as clinical and pharmacologic findings emerge and in response to guidance from regulatory authorities

# Strategic Framework

	Target Market Profile (TMP)	Strategic Target Profile (STP)	Target Product Profile (TPP)
Purpose	Captures all the key information about the market	A vision for a product that will meet the needs of the market	A record of the drug that is most likely to launch
Content	Therapeutic areas/diseases <ul style="list-style-type: none"> <li>• Unmet Need</li> <li>• Patient Populations</li> <li>• Drivers of use</li> <li>• Competitive assessment</li> <li>• Economic cost of disease</li> </ul>	Target attributes (desired profile) <ul style="list-style-type: none"> <li>• Value drivers</li> <li>• Global</li> <li>• Pricing/Reimbursement</li> <li>• Patient Share</li> <li>• Revenue – Profitability</li> <li>• Pharmacoeconomics</li> <li>• Investments (R&amp;D, COGS, SGA)</li> <li>• Cost of goods</li> <li>• Licenses, Royalties</li> </ul>	Indications and usage (label) <ul style="list-style-type: none"> <li>• Dosing and administration</li> <li>• Contraindications</li> <li>• Warnings and precautions</li> <li>• Adverse reactions</li> <li>• Description</li> <li>• Clinical Pharmacology</li> <li>• Clinical Studies</li> <li>• Storage and handling</li> </ul>
Rigidity	Create before the STP or TPP Details are updated as findings emerge, but core facts change only in response to major market events	Set at the beginning of clinical development and updated only when necessitated by changes in the TMP	Updated as clinical and pharmacologic findings emerge and in response to guidance from regulatory authorities

# Questions that needs to be asked and answered during the TPP process

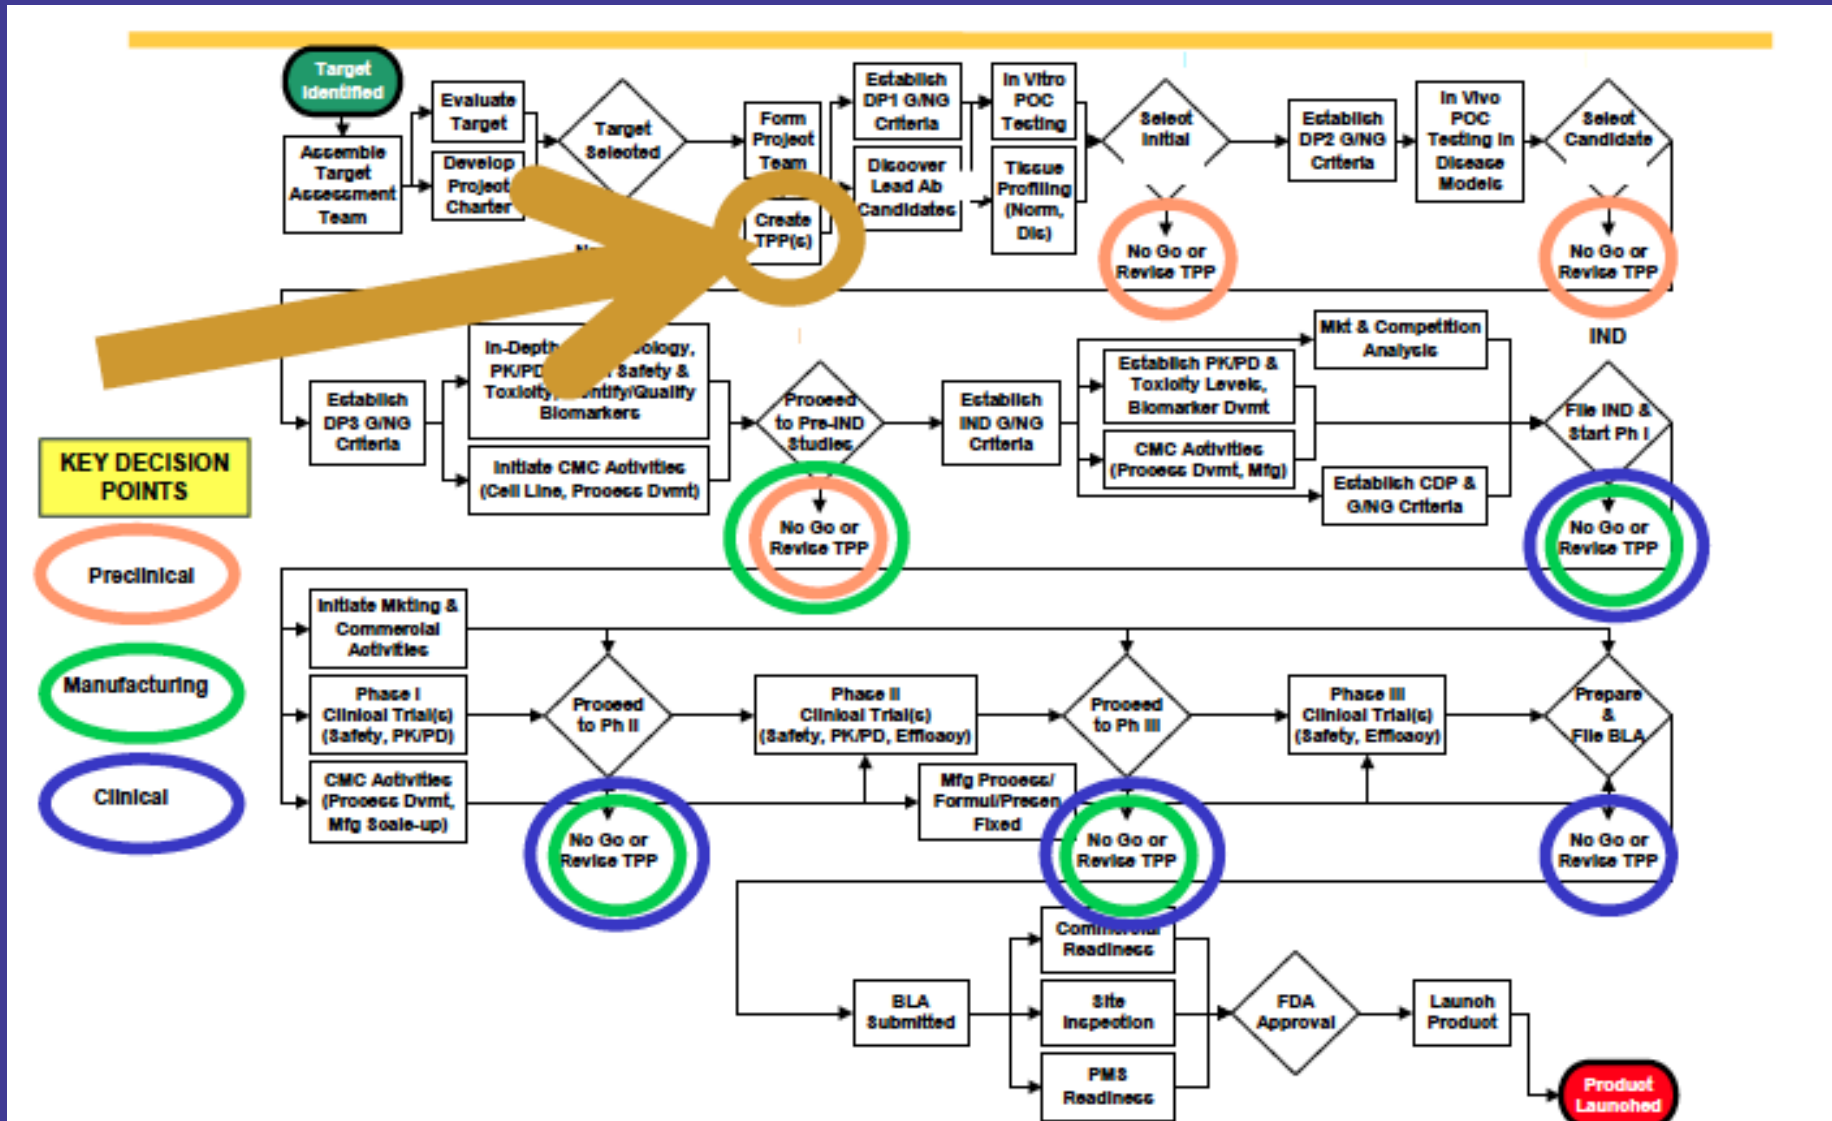

- What is the product description?
- What data or literature is available for review for the various indications and claims?
- What is the unmet need, clinical benefit or value to others?
- Will the product be used for a new or existing procedure?
- What is the standard of care (SOC) for this indication?
- What is the future direction of SOC?
- What is the market potential for each indication and claim?
- What is the probability of success for each indication and claim?
- What are the product's possible differentiating features and will they be obsolete in 5 years?
- What are all of the possible indications for this product (neurovascular, pulmonary, peripheral vascular, gastrointestinal, etc.)?
- What are all of the possible differentiating claims?
- Can premium pricing be justified?
- If so, will payors directly reimburse?
- How is the competitor successful?
- Where does the competition fall short?
- Does IP exist or can it be created?
- Can exclusivity be achieved with a more complex regulatory or clinical strategy?
- If so, what is the company's tolerance or resource availability for such complexity?
- What are the COGS?
- How do development costs compare against five-year return on investment (ROI)?
- How does the net present value (NPV) or ROI compare against other projects?

# Portfolio Optimization – Go/No Go

- Specification – TPP – Current, Minimal, Ideal & Expected
- Resources – Manpower and Cost
- Timeline – Milestone Schedule
- Risk – Probability of Success (Technical, Commercial)

# TPP in Go/No Go Decisions

# Sample TPP

<b>Product Properties</b>	<b>Minimum Acceptable Result</b>	<b>Ideal Results</b>
Primary Product Indication	Relief of pain symptoms in diabetic neuropathy	Relief of symptoms in neuropathic pain syndromes
Patient Population	Adults with diabetes who experience moderate to severe pain	Adults with diabetes who experience moderate to severe pain
Treatment Duration	Chronic	Chronic
Delivery Mode	Subcutaneous injections	Subcutaneous injections
Dosage Form	Prefilled vials with liquid	Prefilled vials with liquid
Regimen	Once every month	Once every 2 months
Efficacy	A 40% decrease in pain score in 30% of patients	A 70% decrease in pain score in 50% of patients
Risk/Side Effect	Devoid of local injection effect and clinically significant CNS side effect	Devoid of local injection effect and any CNS side effect
Therapeutic modality	Antibody

# Best Development Strategies...

- Use the strategic framework (TMP, STP) to shape TPP and define clinical and commercial value
- TPP provides developmental logic and saves cost to drug discovery and development program and meet the needs of the market place
- Encourages right dialog within the company and with the FDA to optimize label and promotability for commercial success
- The ideal development strategy **identify key milestones** -critical times, when the ability of a project to attain its TPP can be assessed - and establish “go / no go” success criteria

# Marketing Create “Beyond the Pill” Solution

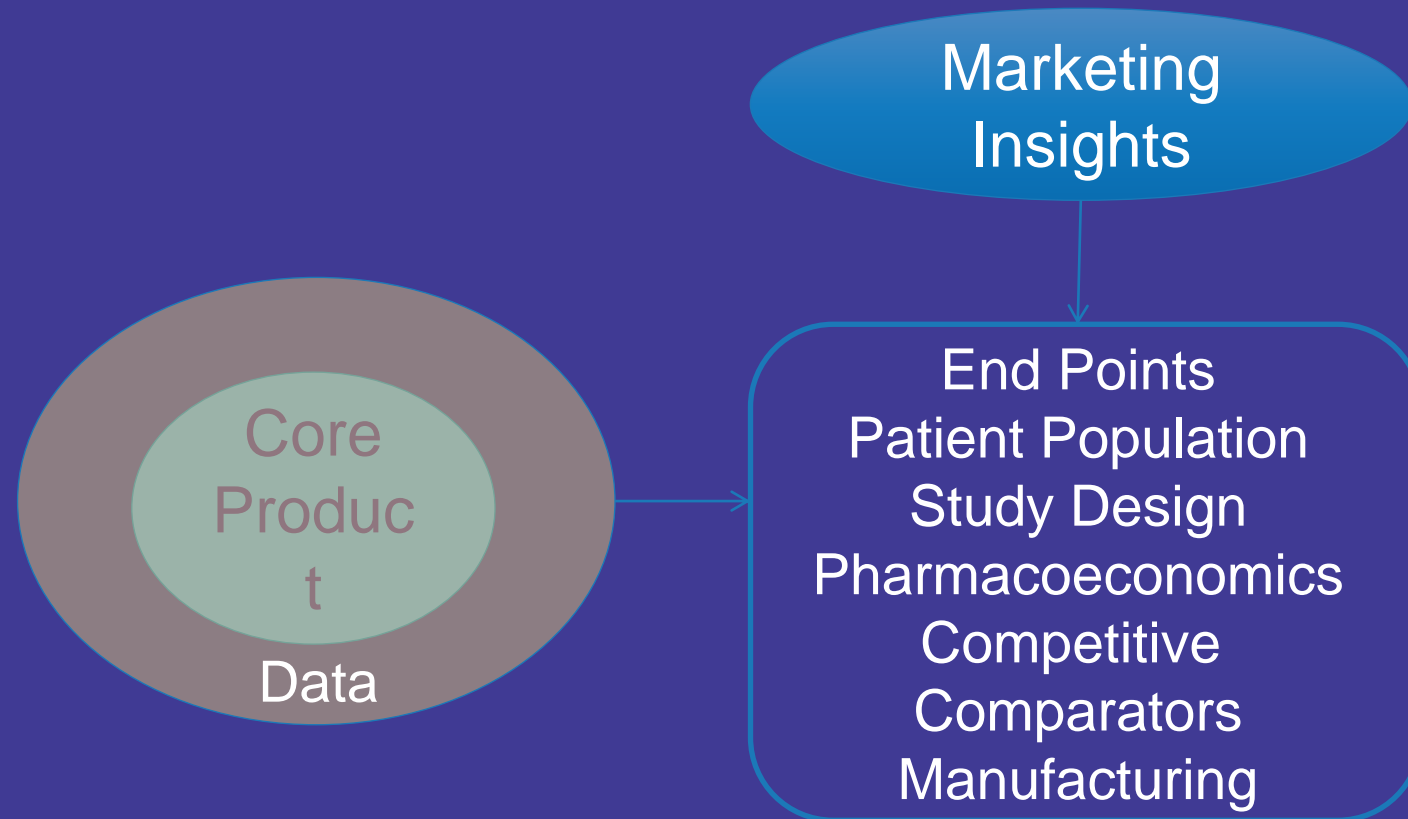

# Marketing Create “Beyond the Pill” Solution

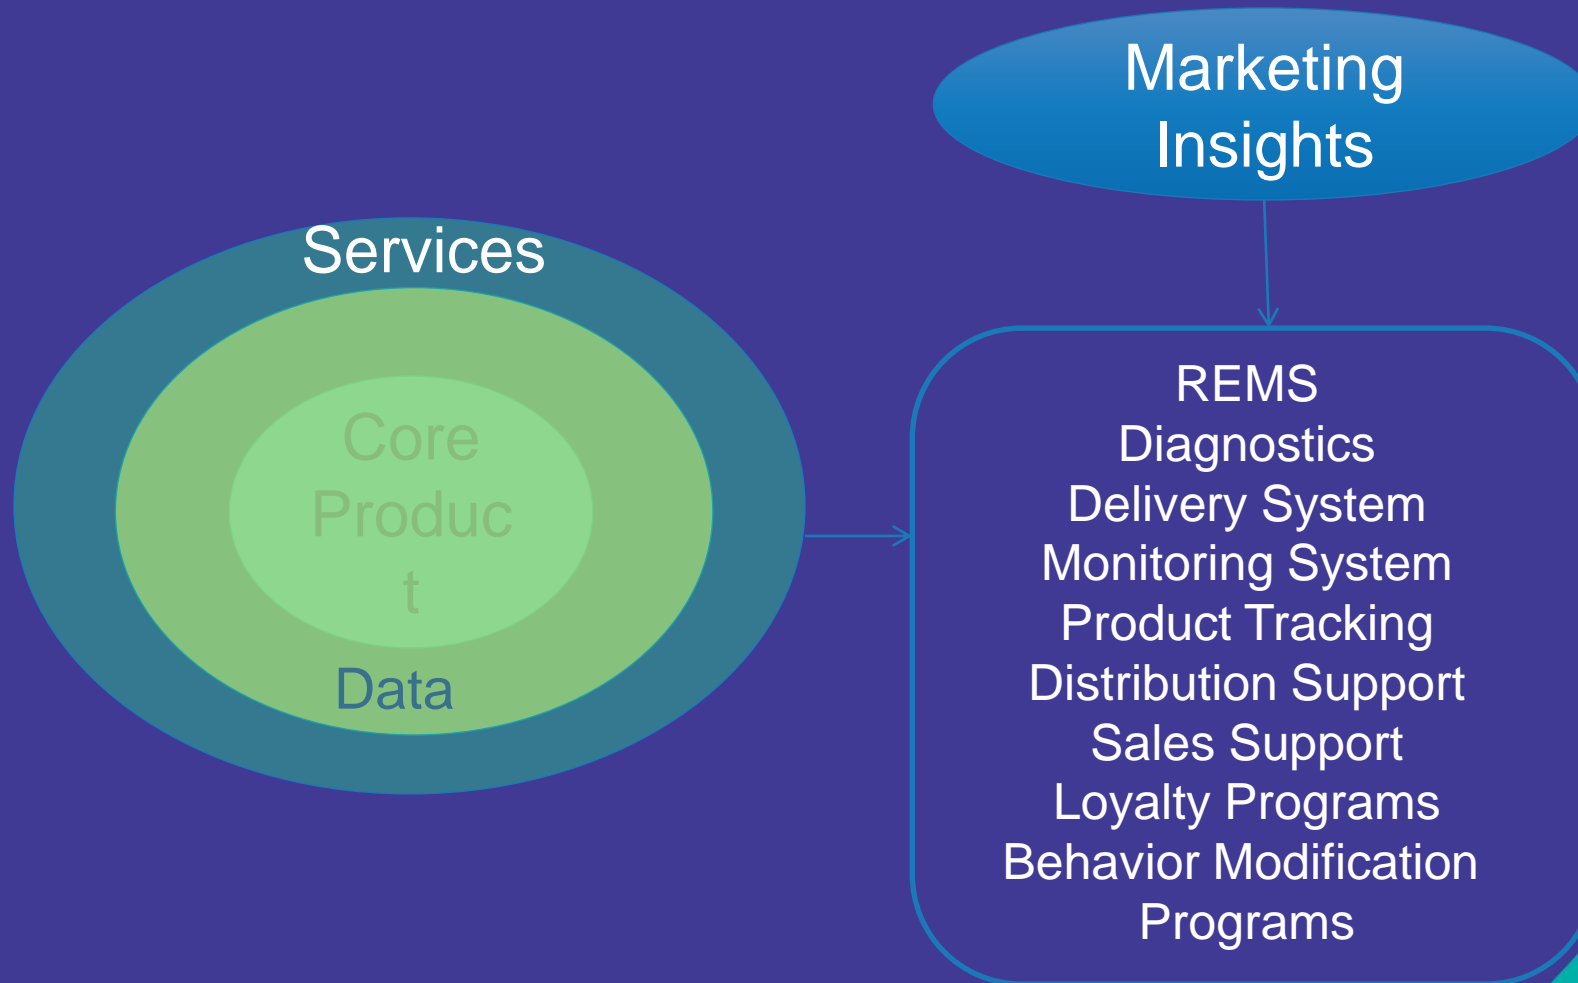

Marketing should shape the “Label” for the product

# Marketing Create “Beyond the Pill” Solution

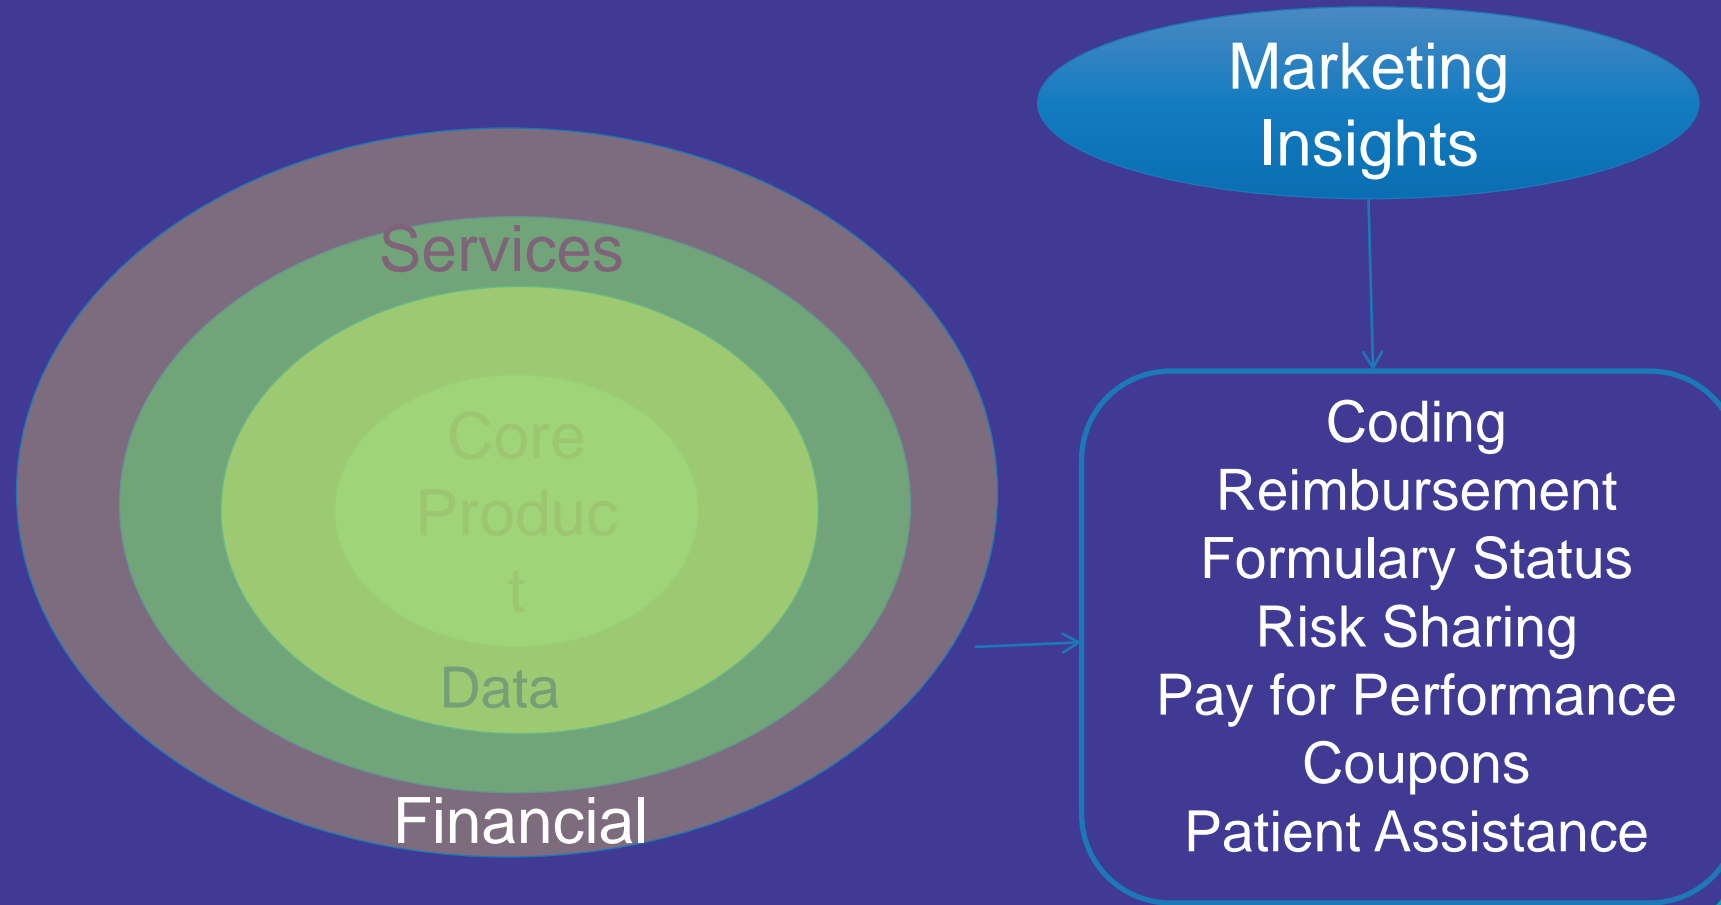

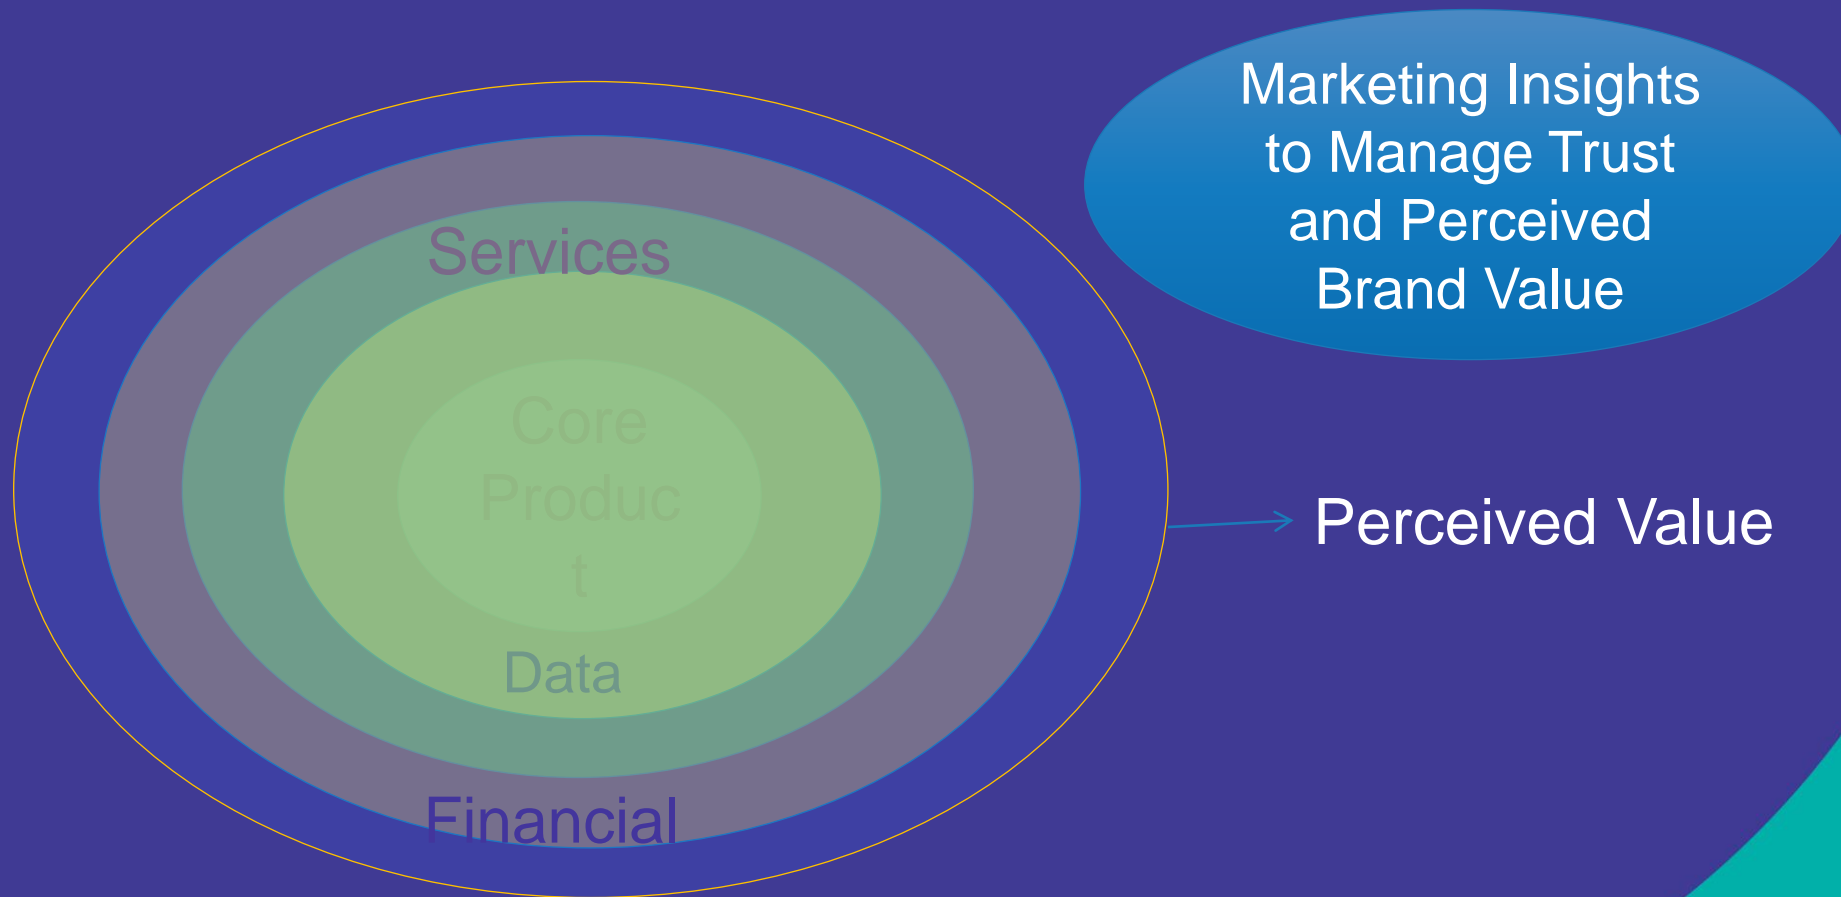

# Marketing Create “Beyond the Pill” Solution

# Marketing Create “Beyond the Pill” Solution

# Marketing Create “Beyond the Pill” Solution

# Final Remarks

- Start with end in mind
- Strengthen the R&D Marketing (Commercial) interface
- Assemble cross functional commercial development team
- Assign a marketing manager to the development team
- Incorporate market research and competitive intelligence in clinical trial planning and label development
- Engage payers early on to get valuable input in development
- Success is when the final version of TPP is similar to the annotated draft labeling!

# Questions???
